

No dose conversion with Humulin[®] R U-500

Two ways to take U-500 insulin: U-500 KwikPen[®] or BD™ U-500 Insulin Syringe.
Dial or draw to the number of insulin units prescribed. No dose conversion needed.

DELIVERY METHOD		EXAMPLE: HOW TO DOSE 100 UNITS OF HUMULIN R U-500
CURRENT	U-500 KwikPen  	Dial to 100 No dose conversion: 100 units = 100 units
	U-500 insulin syringe  	Draw to 100 No dose conversion: 100 units = 100 units
OUTDATED CONVERSION INSTRUCTIONS		DO NOT PRESCRIBE U-100 OR VOLUMETRIC SYRINGE OR INSTRUCT HOW TO USE WITH U-500 INSULIN
PREVIOUS	U-100 insulin syringe  	Draw to 20 Convert the dose: $100 \text{ units} / 5 = 20 \text{ unit mark}$
	Volumetric syringe  	Draw to 0.2 Convert the dose: $100 \text{ units} / 500 = 0.2 \text{ mL mark}$

CURRENTLY:

When the U-500 KwikPen or the U-500 syringe is used, no dose conversion is needed – a unit is a unit.

PREVIOUSLY:

When the U-500 vial was prescribed, the dose had to be converted for a U-100 insulin syringe or a volumetric syringe.

Indication for Humulin R U-500

- Humulin R U-500 is a concentrated human insulin indicated to improve glycemic control in adults and children with diabetes mellitus requiring more than 200 units of insulin per day.
- Limitation of Use: The safety and efficacy of Humulin R U-500 used in combination with other insulins has not been determined. The safety and efficacy of Humulin R U-500 delivered by continuous subcutaneous infusion has not been determined.

Select Safety Information for Humulin R U-500

- Instruct patients using the vial presentation to use only a U-500 insulin syringe and on how to correctly draw the prescribed dose of Humulin R U-500 into the U-500 insulin syringe. Confirm that the patient has understood these instructions and can correctly draw the prescribed dose of Humulin R U-500 with their syringe.

Select Safety Information for Humulin R U-500, continued

- Advise the patient to read the FDA-approved patient labeling (Patient Information and Instructions for Use). Train patients on proper use and injection technique before initiating Humulin R U-500. Training reduces the risk of administration errors such as needlesticks and dosing errors.
- Prescribe patients a U-500 insulin syringe to administer Humulin R U-500 from the vial to avoid administration errors. **DO NOT use any other type of syringe.**

Please see Important Safety Information on back and accompanying Full Prescribing Information. See Instructions for Use included with the pen and vial.
